VOICE: Vocally Optimised Incident Control Equipment

Equip your premises with
a highly reliable public
address system that is
simple to use for both daily
announcements and
emergency situations

VOICE is a multiple-use public address and incident alarm system. It can be used for daily and routine announcements and paging, and for emergency alerts, information and evacuation procedures. It uses spoken messages to relay the location and type of any incident. The system can be programmed so that messages can be tailored to specific locations within a building or area, according to need.

VOICE: Vocally Optimised Incident Control Equipment

Features

- Uses high quality Bosch amplifiers and components proven to be reliable
- Housed in bespoke cabinets made to the highest standards
- Smart multi-voltage power supplies and long-life battery packs
- Zoned microphones allow the operator to address individual building areas
- Messages in multiple languages
- Highly visible colour coded push buttons in public areas for immediate use in an emergency
- Remote monitoring and control over a secure network
- Easily reconfigurable for building, personnel or procedural changes
- Self-monitoring system with no routine maintenance required
- Accredited to ISO9001

Your service from FCO Services

VOICE systems are configured and custom-fitted to your requirements and installed by our team of qualified, experienced engineers.

The system is housed in individually prepared cabinets which use the highest quality components and are rigorously checked and tested before delivery to ensure years of service. The location of controls is customised to best fit your requirements, including the ability to integrate the system with existing digital radio systems for full remote access.

Once installed, the system is fully programmable using an integrated laptop so that as a building or premises changes, the system can be reconfigured to fit, making it a highly cost-effective system.

Power supply is uninterruptable, and hot swappable components and removable panels mean the system can be maintained without being taken out of service.

Post-installation, a full set of spare parts and modules is provided. Faults or issues are clearly displayed on a colour touch screen and the system constantly monitors all the peripheral hardware and provides automatic alerts in the event of equipment failure.

About FCO Services

FCO Services is part of the Foreign and Commonwealth Office, supporting them for more than 65 years. We have shared values, priorities and an in-depth understanding of our customers' needs.

We provide secure services to an overseas network at 267 posts in 152 countries. We work in partnership with our customers to achieve the solutions they need. We have local knowledge on a global scale, adapting our solutions to fit the local environment, and work to drive efficiencies and pass the savings onto our customers.

Our staff are vetted, highly trained and professionally qualified with a huge wealth of experience.
